### **ROFU electromagnetic locks in exterior applications**

This is to advise that the ROFU electromagnetic lock series 8011 has been installed for exterior applications since 1985. Provided the cavity housing the printed circuit board is protected from water entering it thru the wire opening or seams in the housing. The unit performance and the limited life time warranty as shown on the back of the price lists will not be voided by installing the magnets outside.

In case further information is required, please feel free to contact the undersigned.

Sincerely,

*Len Guyt*
