

# Offset Residential Electric Strike

## Introducing the 1410

The 1410 electric strikes are designed for use with cylindrical locksets. They are fail-secure, non-handed, and fully reversible. The 1410 strike replaces the 1401 ROFU strikes.

### Features:

- Designed for cylindrical locksets
- Endurance Cycle 1,000,000 cycles
- Static strength 800lbs
- Fail-secure
- Voltage options: 8-16 VAC, 12VAC/VDC, or 24 VAC/VDC (VAC for intermittent use)
- Non-handed fully reversible
- US26D Finish

### Dimensions:
